EQUIPMENT REPAIRS AND REFURBISHMENT

"NK Technologiay" LLC has accumulated extensive experience in the reconstruction and modernization of cranes, ship loading complexes and other similar equipment. Replacing obsolete and worn-out components with modern ones improves the performance and safety of equipment, and reduces the cost of spare parts. We offer the most optimal variant of work, depending on the current state of the equipment and the existing technological needs of the Customer. Our arsenal includes modernization of electric drive control systems, automation systems, repair and modernization of hydraulic and mechanical equipment. In most cases, both original components and analogues are available to us.
